## Profile

Full Stack Developer combining 3 years of React/Node development with 10 years in architecture. I build pixel-perfect interfaces with a designer's eye – from React components to REST APIs.

## Experience

### Frontend Developer - Contract & Independent Projects - Nov 2023 - Present

- Built and shipped full-stack React applications with Node.js/Express, MongoDB, and JWT auth for real clients.
- Collaborated directly with clients to define requirements, iterate on feedback, and deliver solutions end-to-end

## Technical Skills

Languages & Tools: **JavaScript (ES6+), TypeScript, HTML5, CSS3**

Frameworks / Libraries: **React, React Router, Vite**

State Management: **React Hooks, Context API**

Databases: **MongoDB**

Backend: **REST API design & implementation, Node.js/Express**

Deployment & Tooling: **Netlify, Railway, Render, npm, GitHub Actions (CI/CD)**

UI Patterns: **Component composition, forms, modals, drag & drop, dynamic state syncing**

Other: **Git/GitHub, Agile/Scrum, responsive design, performance optimization**

## Selected Projects

### WaterPleaseApp - Full-Stack React App

Live: <https://waterpleaseapp.netlify.app>

- Drag-and-drop plant grid, custom hooks (useHttpClient, useForm), desktop/iOS-friendly date pickers
- Node.js/Express REST API with document schema and relational data model for plant-user sync
- Optimistic UI updates keeping frontend and backend synchronized.

### ToDoApp - Full-Stack React App

Live: <https://todoappoo.netlify.app>

- JWT auth, protected routes, reusable components (modals, spinners, error handlers)
- REST API with user-specific CRUD, JWT-based auth, and request validation
- UI logic tightly integrated with backend endpoints

### Architectural Model Studio Website (React)

Live: <https://anty-anty.github.io/delmaket/#/en>

- Client-facing multilingual website for a design studio – pixel-perfect layouts, lazy-loaded galleries, scroll-based navigation

## Education & Training

### Self-Directed Engineering Education (5 years)

- Equivalent to CS fundamentals via structured curriculum (React, MERN, TypeScript, REST APIs, system design) – built production apps alongside coursework

## Prior Experience

### Architect / Architectural designer (10 years) - Award-winning international studios

Politecnico di Milano – Master of Architecture, cum laude

Moscow Architectural Institute – Bachelor's & Specialist Degrees

- Designing for real clients sharpened visual precision and spatial thinking, directly applicable to UI/UX decisions
